

Using Grammarly and ChatGPT to Improve Your Writing

If you want to develop better writing skills, follow these steps using Grammarly and ChatGPT as part of your self-study routine:

- 1. Start with a Draft:**
Write your first draft by hand or on your computer without using any tools. Focus on organizing your ideas and expressing them clearly. Don't worry about mistakes at this stage.
- 2. Refine with Grammarly:**
Use Grammarly to check for grammar, spelling, and punctuation errors. Pay attention to the suggestions, and learn why the corrections are needed to avoid repeating the same mistakes.
- 3. Enhance with ChatGPT:**
Copy your revised draft into ChatGPT and ask for advice to improve clarity, coherence, or style. For example, you can say, "*Can you suggest ways to make my writing flow better?*" or "*Check if my sentences are too repetitive.*" Use its suggestions to make further adjustments.
- 4. Review and Finalize:**
After making changes, review your work again to ensure it reflects your voice and meets your goals. Avoid relying too much on AI—use it as a learning tool, not a crutch.
- 5. Disclose AI Use (if required):**
If you're submitting your writing for a class or official purpose, mention that you used Grammarly and ChatGPT. Transparency is essential for academic integrity.

By combining these tools with your efforts, you can make steady improvements in your writing while understanding your strengths and areas to develop further.
